

A4B

THREAD LOSE PREVENTION
IN START SEWING

COMPUTERIZED
LOCKSTITCH MACHINE

- Industry-leading control algorithms, anti thread-off
- Thru-shaft motor upgrade, motor torque increased by 20%
- Automotive-grade CAE simulation, NVH vibration reduction and noise reduction
- Stable motor and control box, and rich in functions

Key Description

- Long press and hold for 3 seconds to restore factory Settings
- Front W sewing mode:
Short press, respectively are front W sewing, front double W sewing, turn off
- Post W sewing mode:
Short press, respectively are post W sewing, post double W sewing, turn off
- Pattern sewing mode:
Click Toggle pattern seam mode, pattern seam edit
- Short press: to enter W stitch mode
Long press: enter the multi-section sewing mode
- Short press: turn on the electronic Electronic thread tension
Long press: turn on the trigger function key
- Short press: turn on the free sewing function
Long press: turn on the auto-trimmer funtion
- Stitch length adjustment:
press + - to adjust the stitch length
- Pressure foot height adjustment:
mm press + - to adjust the height of the lifting foot in the middle
- Short press the cutting line to lift the pressure foot:
after cutting the line to lift the pressure foot,
convenient to collect the fabric
Long press midway stop lift pressure foot:
car stop lift pressure foot, do corner sewing

technical specification

Model	Nedle	thread number	Stitch length (mm)	Presser Foot Height (mm)	Maximum speed (S.p.m.)	Light&Medium fabric	Heavy fabric	volume (mm)	weight (KG)
A4B-A-C	DB×1 11-18#	2	5	5-13	5000	√		690 295 550	40/46
A4B-A-CH-M	DB×1 11-18#	2	5	5-13	5000	√		690 295 550	40/46
A4B-A-CH	DP×5 18-21#	2	5	5-13	3500		√	690 295 550	40/46

Are you still bothered by the following scenario?

Frequent wire break

no moving material

large vibration, loud noise

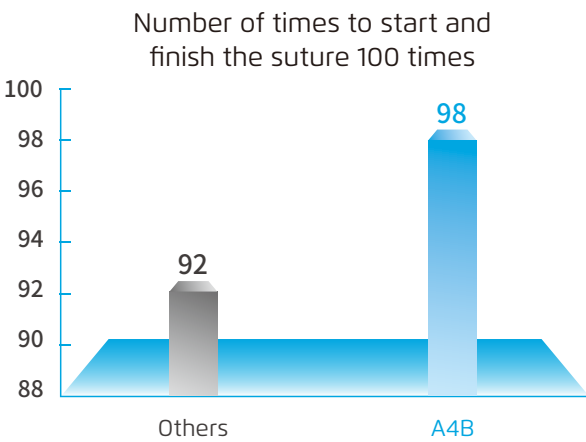

A4B Thread lose prevention in start sewing Computerized sewing machine

The industry-leading control algorithms improve the thread lose prevention rate in start sewing

Thru-shaft motor upgrade, motor torque increased by 20% ;
Automotive-grade CAE simulation, NVH vibration reduction and noise reduction ;
The electronic control of the motor is stable in quality and rich in functions.

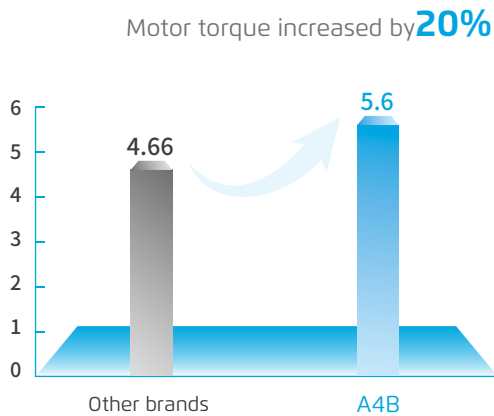

It is the most reliable sewing product of the moment.

Anti thread-off while start sewing

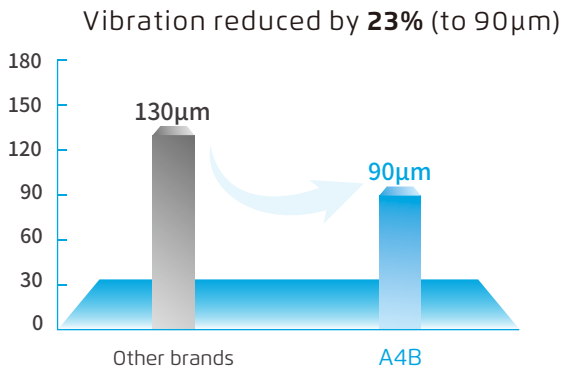

The industry-leading control algorithms, optimization program, improve seam stability, reduce seam off, line breakage problems, plant efficiency increased by 10%.

Easy to heavy fabric, strong penetration

Through shaft motor upgrade, motor torque increased by 20%, thin material sewing speed faster, thick material pedunculating strong constant needle.

Machine stability

Automotive-grade CAE simulation, NVH vibration reduction and noise reduction ; , the inverted needle is lower than 20dB, the vibration of the whole machine is lower than 90μm, quiet and comfortable good recruitment.

other work

Controlled by step moter, adjustable height

precise stitch length, stable and reliable

pattern sewing, fashionable and beautiful
